SAFE ZONE:
Keep all important elements (like images, graphics, type, etc.) inside this area to keep them safe from trim.

Keep all elements away from the trim line (see below).

TRIMMING ZONE:
This is the area where the cutting blade/laser will actually cut. We add an extra bleed area around the edges to allow for a slight movement when cutting. Keep backgrounds in this area.

BLEED ZONE 0.125 inches:
Extend your artwork to the bleed line (region of color) all the way to the edge of the black outline.

IMPORTANT
Please remove this guide layer before submitting your file, or else they will be printed. It should appear on a separate layer.

Final Size: 12 inches x 192 inches Horizontal
Print with Bleed: 12.125 inches x 192.125 inches
